

or

Protects computer media from heat, humidity and fire!

Data tapes, CD's, DVD's, Zip Drives and other computer media need greater protection than paper documents – because temperatures as low as 50°C with humidity above 85% can cause damage. Data lost by heat or humidity cannot be recovered readily.

Nearly half the companies whose computer records are destroyed by fire go out of business!

Features

- Base model - proven 1-hour fire protection UL Classified (USA)
- Media insert - approved fire protection of digital media to 50°C by Swedish National Testing & Research Institute (SP)
